NUTHAWUT LEELAVISEDSAK

.NET Backend Developer

Bangkok, Thailand | 080-9191449 | au.garh1999@gmail.com | linkedin.com/in/nuthawut-leelavisedsak | augarh.github.io

SUMMARY

Backend developer with six years of hands-on experience, now building .NET services for a lending platform in financial services. I also take on system analysis, turning business requirements into API specifications and technical docs, and I put AI agents to work in real engineering workflows. I design the contract before the code, document what I build, and look for repetitive work a tool can take over.

EXPERIENCE

Backend Developer (System Analysis & API Design) | Ngern Tid Lor (NTL) | Nov 2025 – Present

- Build .NET/C# backend services for the verification stage of the loan origination system (LOS)
- Analyse business requirements and design API specifications before implementation
- Documented 32 API endpoints on Backstage (process, experience and system APIs)
- Co-develop an AI SA agent that replaces eight manual system-analysis commands

DevOps (6-month contract) | Thai Beverage Public Company Limited | May 2025 – Oct 2025

- Developed and supported logistics and reporting services in Go
- Designed system architectures and worked with automation pipelines and microservices using Kafka, Argo and Kubernetes
- Collaborated in an Agile team and troubleshot production systems

Full-Stack Developer | Probit Digital Co., Ltd. (Thairath Group) | Nov 2023 – May 2025

- Top contributor to the asset-management system: 483 of 906 commits (53%) in 12 months
- Proposed solutions and improvements to system performance
- Led logistics and asset-management projects for Thairath Group
- Collaborated with: Bangchak, Mae Ruay, and other Thairath projects

Earlier roles | Jan 2020 – Nov 2023

- Programmer, CONNEX Business Online (2023): web apps for Kasikorn Bank, Kiatnakin Bank, TMT Steel
- Front-End Intern, Facgure (2022): Flask web pages and API integration for PTT OR
- Website Developer, JPS Creative Innovation (2020–2021): company websites and inventory system

PROJECTS

Au-OS: multi-agent system on Claude Code | Personal project

- Designed 26 specialist AI agents with routing between them
- Built hooks that enforce review and safety gates before risky actions
- Integrated Jira, Google Sheets and Calendar through tools and MCP

SKILLS

C# / .NET Core, Go, SQL, Kafka, Kubernetes, Argo, Claude Code, MCP, Backstage, Angular, Vue.js

EDUCATION

Bachelor's degree, Computer Science | Bansomdetchaopraya Rajabhat University | 2018 – 2022 | GPA 3.75
Debsirin School | 2012 – 2017 | GPA 3.64
