EDUCATION

Bansomdetchaopraya Rajabhat University
2018 - 2022 | GPA: 3.75

Debsirin School
2012 - 2017 | GPA: 3.64

SKILLS

- C# / .NET Core
- Go · SQL
- Kafka · Kubernetes · Argo
- Claude Code · MCP
- Backstage
- Angular · Vue.js

ABOUT ME

Backend developer with six years of hands-on experience, now building .NET services for a lending platform in financial services. I also take on system analysis, turning business requirements into API specifications and technical docs, and I put AI agents to work in real engineering workflows. I design the contract before the code, document what I build, and look for repetitive work a tool can take over.

EXPERIENCES

November 2025 - Present

Ngern Tid Lor Public Company Limited (NTL)

Backend Developer (System Analysis & API Design)

- Build .NET/C# backend services for the verification stage of the loan origination system (LOS)
- Analyse business requirements and design API specifications before implementation
- Documented 32 API endpoints on Backstage (process, experience and system APIs)
- Co-develop an AI SA agent that replaces eight manual system-analysis commands

May 2025 - October 2025

Thai Beverage Public Company Limited

DevOps · 6-month contract

- Developed and supported logistics and reporting services in Go
- Designed system architectures and worked with automation pipelines and microservices using Kafka, Argo and Kubernetes
- Collaborated in an Agile team and troubleshot production systems

November 2023 - May 2025

Probit Digital Co., Ltd. (Thairath Group)

Full-Stack Developer

- Top contributor to the asset-management system: 483 of 906 commits (53%) in 12 months
- Proposed solutions and improvements to system performance
- Led logistics and asset-management projects for Thairath Group
- Collaborated with: Bangchak, Mae Ruay, and other Thairath projects

January 2020 - November 2023

Earlier roles

Programmer · Front-End Intern · Website Developer

- Programmer, CONNEX Business Online (2023): web apps for Kasikorn Bank, Kiatnakin Bank, TMT Steel
- Front-End Intern, Facgure (2022): Flask web pages and API integration for PTT OR
- Website Developer, JPS Creative Innovation (2020-2021): company websites and inventory system

Personal project

Au-OS

Multi-agent system on Claude Code

- Designed 26 specialist AI agents with routing between them
- Built hooks that enforce review and safety gates before risky actions
- Integrated Jira, Google Sheets and Calendar through tools and MCP
